INDEX—VOL. VIII.

Another Immense Tunnel, 2.
A Stream of Malachite, 3.
Another Experiment in Aerial Navigation, 4.
A New Blasting Powder, 17.
A Gas Company Fined, 20.
Anthracite Coal for France, 21.
A Monster Enterprise, 32.
A Peat Gas Furnace, 36.
A Petrified Australian, 36.
American Antiquities, 50.
A New Kind of Fuel, 52.
Artificial Gas Coal, 68.
Anthracite Used as Medicine, 81.
American Enterprise in South Am., 83.
A Kerosene Telegraph, 115.
Applied Science, 132.
A new Stellar Spectroscope, 145.
An Iron Mountain in Sweden, 179.
A Mineral Belt, 194.
A Powerful Source of Artificial Light, 196.
Auriferous Ores and Sodium Amalgam, 196.
A New Style of Ordnance, 213.
Answers to Correspondents, 216, 232, 248, 264, 280, 296, 312, 328, 344.
Another Serious Colliery Explosion, 230.
A Wonderful Cement for Iron, 277.
Ashcroft's Portable Water Detector—Illus, 336.
Archimidean Screw Ventilator-Illus 337
Aluminium, 371.
A Matter of Fuel, 373.
A Romantically Situated Mine, 376.

Brevities, 4, 21, 48, 52, 80, 85, 101, 180, 229, 275, 292, 324, 341, 357, 374.
Brayton's Patent Steam Generator—Illustrated, 33.
Beath's Reducer and Amalgamator—Illustrated, 65.
Bone Black, 128.
Bessemer Steel—Lake Superior Iron 163
Banquet to Cyrus W. Field, 164.
Bessemer's Process for Steel Making, 242
Bessemer Iron, 242.
Bessemer Steel Rails, 275.
Burning Oil, 321.
Beaumont's Rock Tunnelling Machine at the Paris Exposition, 371.

Coal Waste, 3.
Cannel Coal in the United States of Columbia, 51.
Colorado Mining, etc., 64.
Crushing a Silver Wall, 65.
Correspondence—
Utilization of Gas House Lime, 68.
The Ignition Test of Petroleum, 84.
Sodium Amalgam Process, 116.
Oil in the West, 133.
Shall I put a Pump in my Well? 133.
Plastic Slate Roofing, 149.
" " " 165.
" " " 181.
Nicholson Pavement and P. Slate, 197
Durability of Mastic made of Coal Tar and Sand, 214.
The Gold Mines of Vermont, 214.
Plastic Slate, 229.
" " 245.
Prof. Wurtz's Working Experiments with Sodium Amalgam—Big Results from Colorado Sulphurets, etc., 962.
Mineral Resources of the Pacific Coast, 277.
Detaching Carbon from Retorts, 293.
Air in Gas, 293.
Gas Works at Brazil, 325.
Gas in 1816 and 1867, 341.
Plastic Slate *vs.* Fire, 357.
Compasses in Iron Ships, 115.
Cheeseman's Solid Wood Trays for Gas Purifiers 129.
Concrete Foundation, 132.
Crushing and Stamping Superseded, 132
Copper and Gold Mines in St. Domingo, 163.
Cheeseman's Solid Wood Trays for Gas Purifiers, 178.
Combustion of Fuel in Furnaces, 178.
Cause of the Smell of Hydrogen Gas, 194.
Charcoal as a Preservative of Wood, 211
Chemical Action of Water in the Formation of Mineral Veins, 241.
Central Pacific R. R—Cars Running, 281
Croton Water, 306, 323, 338.
California Copper Mines, 309.
Carbonic Acid Gas as a Fire Extinguisher, 354.
Carbon, 355.
Curious Facts in Science, 372.

Don't Sell Peat Swamps, 2.
Dividends, 2.
Discoveries of the Last Fifty Years, 37.
Dr. M. C. Davis' Sheep Shearing Machine, Illus. 191.
Destructive Fires—Plastic Slate, 229.
Deodorizing Petroleum and Mineral Oils, 293.
Drying Peat, 310.
Danger of Our Artificial Lights, 370.

Editorials—
Our Journal, 8.
The Great Coal Monopoly, 8.
Prospect Park, Brooklyn, 8.
A Novelty in Navigation, 8.
Gas Explosion in Avenue A, 8.
Brooklyn Water Works, 8.
Heat Produced by the Agitation of Water, 9.
Mining Interests, 24.
"Economy is Wealth," 24.
Petroleum in Ulster County, 24.
City Directory, 24.
New Hydraulic Gas Main, 24.
Thompson's Gas Controller, 24.
Improvements in the Manufacture of Illuminating Gas, 40.
The Atlantic Cable, 40.
Montreal Water Works, 40.
Amalgam Sample, 40.
The Author of Public Drinking Fountains in New York, 41.
Brooklyn Tube Works, 56.
Complimentary Resolutions, 57.
Coal Fuel—Its Economy and Substitutes, 56.
The Chicago River to be Tunnelled, 57
An Amalgam of Magnesium, 57.
Webster's Patent Wrench, 64.
Gwynne's Process of Manufacturing Gas at Elizabeth, N. J., 72.
Quality of Gas Supplied by Gas Companies, 72.
The Mining Region of Ulster, 72.
